## DETAILED ACTION

### *Continued Examination Under 37 CFR 1.114*

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1/5/2010 has been entered.

### *Response to Arguments*

2. Applicant's arguments, see pages 9-12 of the remark, filed on 1/5/2010, with respect to 35 U.S.C 103 rejection under Wu et al, Nagata and Bohnke have been fully considered and are persuasive. The 35 U.S.C 103 of claims 1-21 has been withdrawn. However, the 35 U.S.C 112 1<sup>st</sup> paragraph rejection is maintained. Please see below.

3. Applicant argues, see pages 8-9 of the remark, filed on 1/5/2010, "decoding in a single iteration through a set of frames" is supported by paragraphs 37-38. The examiner disagrees. There's nothing in paragraph 37 describes processing through the set of frames frame by frame and writing frames to buffers, i.e., **in a single pass**. Paragraph 38 describes the display order of the frames, which is different from the decoding order of the frames in MPEG. There's nothing in paragraphs 37-38 describes "decoding in a single iteration through a set of frames"

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-21 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

For claims 1, 8 and 14, there's no description for "decoding in a single iteration through a set of frames".

Claims 2-7, 9-13 and 15-21 are also effected.
